

**VUSION NAMES GROVER RIGHTER TO MARKETING POSITION
ADDING MORE INTERNET VIDEO EXPERTISE TO EXECUTIVE TEAM**

Milpitas, California – 5 May 2008 – Vusion, Inc., providers of Instant-On, Full-Screen, HD Quality streaming video, announced today that Grover Righter has been named vice president marketing. Mr. Righter will be responsible for building the long-term brand and market-facing strategy for commercial-grade video streaming over the Internet. He joins a team of industry veterans and network service innovators at Vusion (formerly Jittr Networks).

Grover Righter has held executive positions in business development, sales, marketing and product development at AT&T, Ortiva Wireless, Kabira, Novell, Geoworks, and SCO. He has significant experience in consumer video, mobile telecommunications services, financial services.

At Ortiva Wireless, Mr. Righter lead the first commercial launch for video services to mobile consumers, and was a key executive in the company's first customer engagements. His development teams designed the secure enterprise object directory at Novell and he headed the wireless content and services initiative at Geoworks, resulting in major sales to global telecom system providers. Grover is actively involved in the JCP, IETF, IEEE and ITU technical standards. He has degrees in mathematics and computer engineering and has completed the International Business Marketing program at INSEAD.

About Vusion (formerly Jittr Networks)

Vusion provides an advanced, end-to-end video distribution service that radically improves the user experience for streaming Internet video. Vusion's customers include content and digital media providers, and content delivery networks who need to offer high-quality and mixed media to large populations of end-users. The Vusion streaming video delivery service is based on cutting-edge technology, including proprietary algorithms, protocols and software. The Vusion unique instant on video service provides an end-user experience that is second to none and enables new Internet business models based on advertising, subscription services, syndication and pay-per-view with full DRM.
